

A Line in the Landscape

OUTDOOR ACTIVITY

OUTDOOR ACTIVITY, A LINE IN THE LANDSCAPE

A LINE IN THE LANDSCAPE OUTDOOR ACTIVITY

While wandering in the landscape you can uncover a world of mystery and wonder right under your feet. Make a line in the landscape and see what you can uncover along the way!

YOU WILL NEED:

A sheet of card (A cereal box would be just perfect), scissors, ruler, pencil, double-sided tape, and a good eye for detail!

1. Cut your card 30cm x 10cm. Stick a 20cm strip of double-sided tape along the centre of your card (keep the top tape on for now)
2. Go for an outdoor wander, through the woods, along the high tide line, any space with fantastic organic diversity.
3. Stop your wanderings when you're feeling good
4. Now with card in hand pick a line in the landscape and walk for 20 strides. With each stride stop, pick up a small object peel back your tape and stick it down
5. With 20 strides and 20 objects on your 20 cm tape marvel at the diverse details in nature.

WANT MORE?

Go for a longer wander with a different eco system. Try collecting every 10 breaths, 5 blinks or every time you hear a bird call, make your own system!
